

PRODUCT RELEASE NOTES

LABELVIEW™

Version 8.10

TEKLYNX International

June 1, 2007

LABELVIEW™ Version 8.10

LABELVIEW 8.10 delivers new functionality, fixes and corrections, new printer drivers, and printer-specific fixes and corrections that have been made since the release of version 8.03. This release notes document highlights the features and corrections made in version 8.10; the release notes for previous versions can be found on the TEKLYNX website at www.teklynx.com.

LABELVIEW 8.10 is available in three main editions: Basic, Pro and Gold. All editions are shipped with an English Installation Guide, Quick Start Guide and CD.

New Features

- Added support for the Windows Vista operating system.
- Enhanced OLE DB connections to simplify the process of creating connections for file-based databases.
- OLE DB data sources can now create and use custom SQL statements.
- Added the option to install a printer when loading a label that was saved with a printer other than the currently active one.
- Improved font conversions.
- Added the Wal-Mart RFID label template.

New Printer Drivers

LABELVIEW 8.10 includes new drivers for the following printers:

Fixes and Corrections

- Fixed issue where an object would shrink to a small object box if the TrueType font was changed from the Style Bar.
- Fixed issue where File > Open was not working if the Quick Print dialog box is cancelled after it opens.
- Fixed issue occurring in the Basic edition of the program where a square was appearing in the top left corner when a label was opened or created.
- Made a change to how LABELVIEW is closed/hidden if the program is started through automation. Now, if you exit LABELVIEW via the File menu or by clicking the upper-right close button, LABELVIEW will be hidden rather than actually closing. The automation host must close LABELVIEW.

Printer-Specific Fixes and Corrections

- **CAB A+ Series printers:** Fixed issue causing the program to shut down when a bar code is selected.
- **CAB E Series printers:** Fixed issue causing the program to hang and then shut down when selecting the label setup options.
